

1BestariNet

Under the landmark 1BestariNet project led by the Malaysian Ministry of Education (MoE), we are proud to deliver a cloud-based virtual learning platform and high-speed Internet connectivity to 10,000 schools nationwide.

The 1BestariNet project seeks to transform the education arena and establish Malaysia as a model of excellence in integrated, Internet-enabled learning by providing all state schools with 4G connectivity to [Frog's Virtual Learning Environment](#) (Frog VLE), which offers exceptional control enabling teachers, admin staff and even pupils to fully embed their learning platform into the school's working practices and tailor it to the needs of their school. This government initiative will make Malaysia the first country in the world to make 4G broadband access and a VLE available to all schools throughout the nation.
